

## BGC-2100S

### ADVANCED FILTRATION TECHNOLOGY

This AquaMOR Foodservice brand water filter contains a polyphosphate scale inhibitor and a graded density spun bonded polypropylene filtration cartridge. The scale inhibitor reduces the accumulation of minerals that lead to hard water spots from lime scale build up on equipment. The polypropylene block provides tremendous capacity to remove and/or reduce sediment that may be present in your drinking water. These processes ensure that you are getting the cleanest water possible.

This economical filter will provide you with months of protection by reducing hard water build up in any beverage or food equipment application.

## FILTER FEATURES

- NSF Certified
- Economical alternative to expensive filter substitutes
- Delivers clean water as it reduces sediment
- Significantly reduces hardness build up due to minerals present in the water supply
- Designed to provide up to twelve months of life
- Does not remove minerals which may be beneficial to health

## SPECIFICATIONS

<b>Micron Rating:</b>	5 Micron
<b>Dimensions:</b>	3.1875" x 12.25" (8.1 x 31.11 cm)
<b>Operating Pressure:</b>	25-125 psi (1.7-8.6 bar)
<b>Operating Temperature:</b>	35°-100° F (1.7°-38° C)
<b>Life:</b>	12 Months

Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system.
